Burning-free brick machine

The machine is 8-hole disc brick press, which produces burning-free adobes mainly in use of the raw materials such as fluvial sand, scoria, slag and fly ash etc. The produced adobes meet the national standards with high production efficiency and high quality. It has the important relevance to the demands of national construction, the changing wastes into valuables, the environmental protection, the arable land protection and the benefit to descendants. So the equipment will bring you considerable economic benefits.
